

Digital File Information Sheet

File Formats

We accept only Macintosh files for the following applications:

- Adobe Illustrator (CS3)
- Adobe Photoshop (CS3)
- Adobe InDesign (CS3)
- Adobe Acrobat (CS3)
- Freehand (10.0)
- QuarkXpress (7.0)

Fonts

We can accept only PostScript Type One and TrueType fonts or you may convert your fonts to outlines.

File Scaling

For large images, set up your files at 1/12 scale (1" = 1') to help reduce file size.

For vehicle wraps, always set up your files at 1/20 scale.

If you need a vehicle template we can provide you with one.

Scan Resolution

100 dpi at final size. For example, a bitmap used in a vehicle template would need to be scanned at 2000 dpi for a final output of 100 dpi (1/20 scale).

Compression

Please compress files using Stuffit or Winzip when transferring files via email or ftp.

Pantone Color Matching

We cannot match Pantone colors. We can only duplicate them by using their CMYK equivalents.

Bleed

Please provide at least 2" bleed around entire image (at final size).

Submitting Jobs

We accept most media. You may also submit large files via ftp. A link for submitting ftp files is located at our website : www.foxmarkcorp.com. Or, if you are using software such as Fetch, use these settings:

Host: ftp.foxmarkcorp.com

User ID: spring

Password: foxmark

If you have any questions, please contact our imaging department:
